## About us

### What defines us

*“We believe that what best expresses who we are is our product and our customers, so, we simply invite you to get to know us better”.*

**Aleix Triana**

## The company

### Who we are

IP Triana is a company dedicated to designing and producing plastic containers for the pharmaceutical, food and phytosanitary sectors.

Some of its clients are among the leading companies of the sector with a volume of 125 million pieces sold (2014).

### Business model

The history of IP Triana is the history of the plastic sector and the economic development of Spain during the second half of the 20th Century. In 1962, the Triana Vila marriage was the starting point of an entrepreneurial venture in Barcelona, which nowadays continues keeping its familiar core but with an international presence.

The company bases its model on innovation, flexibility and quality. Through the established infrastructure, IP Triana offers specific solutions and tools to their customers to achieve competitiveness in their markets. Teamwork built on human relations that we care for on a daily basis.

IP Triana is a company capable of adapting to the needs of each of its customers. True to its origins and legacy, its customers are the assets of the company. At present, IP Triana employs 60 people focused on the production for their customers and to provide technical solutions for each situation, which is something that has permitted a considerable development of its activity at an international level in recent years.
